Personally we regard Fall planting as preferable to Spring for a number of reasons, the principal one being trees and plants set in the Fall become established during the winter and gain a very early Spring start, hence make good growth first season.

SEND ALL ORDERS TO GLEN BROTHERS, Inc., Glenwood Nursery

Established 1866

"We Furnish The Home—Outdoors" 1762-1772 Main St., Rochester, N. Y.

Another advantage of Fall planting. Trees and plants set in the Fall receive the benefit of the late Fall and early Spring rains which are of vital importance.

We have customers in and ship to every state in the Union.

Illustrated 2 of our Chinese Elms planted 5 years ago when 4 ft. tall. These trees now are 40 feet tall and are planted in front of the residence of Dr. Clarence Thomas, Greenfield Lane, Rochester, N. Y.

Glen's North China Strain of Chinese Elm THE SPEED TREE

For quick growing shade, plant this Chinese Elm. Beautiful, fast growing, hardy. The Chinese Elm is strictly an Elm, having the desirable characteristics of the native Elm but none of the undesirable root characteristics of other fast-growing trees, such as the Carolina Poplar. Its rapid growth is remarkable, while at the same time it is as hardy as an Oak and is as graceful as the Cut Leaf Birch. It is good for street planting, windbreaks, screen or as individual specimens about the lawn.

These people wanted quick shade and got it. We quote from recent letters received from our customers.

From C. D. Madden, Clarksville, Ohio. "About 4 years ago we bought a 6 ft. Chinese Elm from you which has now reached the height of almost 30 feet. Everyone comments on its beauty and how fast it has grown."

From W. E. Straup, Circulation Mgr., The Farmers Guide, Huntington, Ind. "We already have 20 of your Chinese Elm Trees on our place and like them very much. They are all you claim for them."

From Mrs. C. Frank Dolman, 1724 Beaver St. Parkersburg, W. Va. "We bought 2 Chinese Elms from your nursery in Spring, 1932. They are now large, fine shade trees and admired by everyone. They are a beautiful shade."

From Mrs. George R. Taggart, 613 Maryland Ave., Adams, Pa. "My Chinese Elm is growing beautifully and is a most graceful and beautiful shade tree."

From H. R. Clark, Adrian State Bank Bldg., Adrian, Mich. "I want to take this occasion to tell you the Chinese Elm which I purchased from you 4 or 5 years ago has grown from a tree 4 to 5 ft. in height to a large tree. I will not dare to give you the size but it is a wonderful tree and already affords a nice amount of shade."

From E. C. Holt, 702 North Carolina Bank and Trust Bldg., Burlington, N. C. "Please send me 10 Chinese Elms, 5-6 ft. Please give me good selection as I want most of these for my neighbors. We are amazed at the growth of the one I bought from you several years ago."

From Mr. George Simmons, 70 Mount Pleasant Ave., Troy, N. Y. "I have one of your Chinese Elms which I purchased about 3 years ago. It has grown splendidly and makes a great deal of shade. The tree is now about 23 ft. tall."

PLANT THIS FALL—ORDER NOW

Size	Each	Per 10
4-5 ft.	\$1.00	\$ 8.75
5-6 ft.	1.50	13.75

EXTRA Enormously Large APPLE TREES SPECIAL

EIGHT YEARS OLD—EVERY TREE BEARING AGE

9 TO 12 FEET TALL—SMOOTH TRUNKS—WELL BRANCHED TOPS—GOOD ROOTS

Every tree has been sprayed, has received the same care and cultivation as trees in a young orchard—take our word for it, they are fine. For Fall planting we offer a limited quantity of these extra large matured Apple Trees. The assortment of varieties is somewhat limited but each one of the varieties offered is one of the best in its class. Make your selection from the following:

MELBA	CORTLAND	EARLY McINTOSH
McINTOSH	NORTHERN SPY	RED ROMÉ
ORLEANS	WEALTHY	

Personally we regard Fall planting as preferable to Spring for a number of reasons, the principal one being that trees of this size set this Fall become established during the Winter, gain a very early Spring start, hence make good growth the first season. If you have lost any trees from the effects of the extreme cold weather during the past few winters, these trees would make excellent replacements. If upon unpacking you do not find them satisfactory in height, caliper, smoothness, root system or any other cause, merely repack and return to us via freight collect and we will immediately refund your money plus the transportation charges you have paid. Our stock of trees is not large, hence we suggest ordering immediately for shipment at the proper time for Fall planting. Several years ago we sold similar trees at \$10.00 each but owing to present business conditions we are disposing of this lot of trees while the stock lasts at the following low prices:

\$3.75 each	\$35.00 per 10	\$300.00 per 100
-------------	----------------	------------------

If you have any doubts about these trees being actually worth from \$5.00 to \$10.00 each, come and see them.

OUR FALL ROSE OFFER \$4.50

10 of the choicest varieties, two years old, field grown blooming plants for Fall planting. These 10 big ROSE PLANTS in a choice assortment, one each of 10 different kinds, only \$4.50; 45c apiece—the largest, finest 2-year-old plants ever offered. If you should happen to be touring through Rochester this Summer, make it a point to call at our office at 1768 Main Street and we will drive you out to Glenwood Nursery where you can see these varieties in actual bloom. These roses bloom from June until frost, and don't forget this collection costs you but \$4.50, for October and November planting, and personally we regard Fall planting as preferable to Spring for many reasons, the principal one being that trees and plants set in the Fall become established during the Winter, gain a very early Spring start, hence make good growth the first season. They also receive the benefit of the late Fall and early Spring rains which are of vital importance.

ONE EACH OF THESE 10 CHOICE VARIETIES:

E. G. HILL—Large, deep crimson, blooms in abundance throughout the season. We regard E. G. Hill as an outstanding red rose and no rose garden is complete without it.

DAME EDITH HELEN—A magnificent fragrance, full-bodied new rose of richest pink, blooms full, many petaled and intensely fragrant. A beauty.

PINK KILLARNEY—Intensely brilliant, clear pink. The flower is perfect, the bloom free and the bush vigorous. Heavy bloomer throughout the season and a rose everyone wants.

PRES. HERBERT HOOVER—A glorious multi-colored rose that became popular over night. Unfolding its broad, thick petals unhurriedly from the beautiful pointed bud. Color: Vivid cerise-pink, softly flamed with yellow, orange and scarlet.

ETOILE de HOLLANDE—Brilliant crimson red. This is one of the most dependable long-lived and finest of all red roses. The blooms are wonderful and fragrant and this assortment of roses would not be complete without Etoile de Hollande.

LOS ANGELES—One of America's finest two-tone roses. Flowers large and continuous in color, flame pink toned with coral and shaded with translucent gold at the base.

TALISMAN—The most gorgeous assemblage of colors in one flower ever presented by a rose. Gold, apricot-yellow, blood orange, deep pink and old gold. Very fragrant and probably the most popular rose in America today.

MARGARET McCREEDY—One of the showiest of all roses. Rich Oriental red, passing to carmine-rose. Blooms all season. Spicy fragrance.

MRS. P. S. DuPONT—A great prize-winning rose. Clear yellow with orange-yellow heart. Long-lasting blooms all summer and fall. A great beauty.

MME. EDOUARD HERRIOT—Winner of the \$50,000 prize offered by the London Daily Mail. Coral red buds shaded yellow, copper-orange and tinted yellow and scarlet. A rose that wins a prize of \$50,000 in competition with hundreds of other varieties must have everything. This rose has a beautiful bud, exquisite colorings, long and continued blooming. Fragrant.

ORIGIN

The Boysenberry was developed from three blackberries of unknown origin, Cuthbert raspberry, and loganberry. All of these berries are hardy and while we have only had the Boysenberry for two winters, our experiments have indicated that it is just as hardy as its parents.

TRUE TO NAME

Our Boysenberry plants are absolutely guaranteed to be true to name. There is not the slightest chance to find among them anything but a No. 1 plant because they have been carefully grown from original stock and carefully separated from all other stock.

IMMENSE SIZE

It will take from 120 to 160 young berries or 200 or more blackberries to fill a pint basket, 60 to 80 Boysenberries will do it. In California the Boysenberry has produced 13,000 pounds to the acre.

RESERVE NOW

There have now been reserved ten times more plants than were sold up to January 1st last season and if you desire to plant the Boysenberry this coming season it would surely be wise to make your reservation now. Not 1/10 of the population of the United States has seen or tasted this marvelous berry and when they do there is going to be the greatest stampede for these plants that has ever been known for any plant.

VERY SWEET

If the Boysenberry is permitted to remain on the vine until it is fully ripe it is much sweeter than any other vineberry. When eating fresh, no sugar is necessary because it has a very high sugar content.

USES

No vineberry can compare with its delicious flavor when it is made into jelly, jam, marmalade, or canned. In addition to this, it makes a most excellent fountain drink by adding four times water and a little sugar. Those ice cream makers who have tried it in sherbet immediately found it to be the very best seller.

IMMENSE PRODUCTION AND PROFIT

Ted Moss, Mentone, Calif., has made affidavit that he set out 100 Boysenberry plants the spring of 1935 and made from this planting \$311.10 by June 30, 1936. 100 plants will set out 1/10th of an acre. Therefore, this was at the rate of \$3,111 per acre.

COLD SECTIONS

Boysenberries have been exposed to 17° degrees below zero the past winter and were not killed, while other brambles around them were completely frozen. See The Country Gentleman article page 39, August number "The Boysenberry Proves Hardy."

CULTURE

Boysenberries should be treated just like any other bramble and will do well in almost any soil, either heavy or light, providing it is not alkaline, and is fertilized and receives sufficient moisture.

CULTIVATION

Berry vines are shallow rooted. Therefore deep and frequent cultivation merely tears to pieces the roots which cost good money to develop. It has been found that about the only cultivation necessary, to most soil, is to remove weeds.

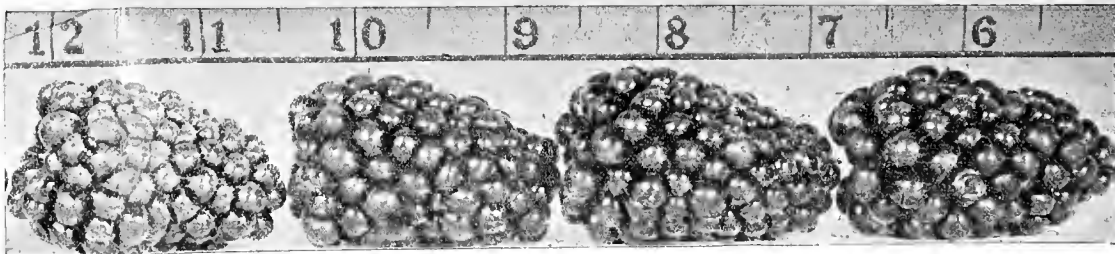

FERTILIZATION

There is nothing better for fertilization than barnyard or chicken manure. However, you may carefully use any kind of fertilizer that is high in nitrogen.

DELICIOUS FLAVOR

The Boysenberry has a distinctive flavor, altogether different from any known berry. Fifty-two ladies questioned on one day, after tasting it, said that its flavor was somewhat suggestive of the raspberry.

These Berries Selected. Average Size 1 Inch in Diameter and 1½ Inch Long

THESE FOUR BERRIES WERE PART OF 18 THAT WEIGHED 11 OUNCES

No. 1—Strong tip rooted Boysenberry Plants from original stock, \$2.50 per 10; \$20.00 per 100; \$150.00 per 1000
No. 1—2-yr. Transplanted stock, \$3.50 per 10; \$30.00 per 100; \$250.00 per 1000

VERY SPECIAL--Specimen California Privet Plants for Immediate Effect

We offer for Fall planting a limited quantity of beautiful, bushy California Privet that will grade 4 to 5 ft. in height, each plant containing many branches. These plants have been properly spaced in the nursery row and were grown to be expressly used in our landscape work to produce immediate effect. We have a surplus of several thousand plants and while they last we offer these large, beautiful plants grading fully 4 to 5 ft. tall at \$18.00 per 100.

Plant them one ft. apart. These are a real buy as it is very seldom we or other nurserymen offer such large, beautiful hedge plants. Order now for Fall shipment.

Six Showy Lilacs
THE FAMOUS HIGHLAND PARK VARIETIES

These Six for
\$6.25

Lilacs Grow Everywhere -- Anyone Can Have Lilacs

Our collection is admirable. We were helped in the selection by the late Mr. John Dunbar, famous as the assistant superintendent of Highland Park, Rochester, N. Y., containing one of the finest collections of the world. In the last 5 years we have sold at retail nearly 25,000 plants, shipping to nearly every state in the Union. We have selected the following six choice varieties which we have named "Highland Park Collection." We offer the collection composed of one each of the varieties described to a limited number of customers. These plants are of an age and size to produce immediate effect as ours are strong 3 to 4 foot plants, well rooted and branched. Order now before stock is exhausted.

BELLE de NANCY—Flowers pink, white center.
GENERAL PERSHING—Bluish-lavender.
HIRAM H. EDGERTON—Violet-lavender.

MME. LEMOINE—Pure white.
PRES. GREVY—Lilac-blue.
PRESIDENT ROOSEVELT—Bright purplish-red.

Gorgeous Collection of HARDY FLOWERING SHRUBS

Consisting of
12 Different Varieties

Varieties comprising this collection were selected after careful consideration as being 12 varieties that will give the average planter the most everlasting beauty for the least possible outlay in cash. There are 5 shrubs 3 to 4 feet and 6 shrubs 2 to 3 feet and one shrub 18-24 inches. All are well rooted, well branched and will produce immediate effect. These 12 gorgeous shrubs packed in one bundle for only \$4.75.

HONEYSUCKLE (Tatarian)—Size 3-4 ft. Delicately cut attractive foliage. Bright pink flowers followed by scarlet fruits. Splendid for planting along the base of walls or porches or in the shrub border.

JAPANESE QUINCE—Size 2-3 ft. Brilliant scarlet flowers appear in early spring in clusters all over the plant. One of the most dazzling shrubs when in bloom.

SPIREA VAN HOUTTE—Size 2-3 ft. A handsome, gracefully arching shrub with long drooping sprays of white clusters of small flowers around Memorial Day. Very very showy.

HYDRANGEA P. G.—3-4 ft. Tall spreading-branched shrub. Leaves oval, 4 to 6 inches. Very dark. July and August. Its massive blooms of white flowers later changing to pink bend the branches with their weight.

RED LEAF JAPANESE BARBERRY—Size 18-24 inches. Similar in all respects to the green leaf Japanese Barberry but the foliage of this variety is of a rich lustrous bronzy-red similar to the richest Red Leaf Japanese Maple.

VIRBURNUM DENTATUM—Size 3 to 4 ft. Sometimes called Arrow-wood. Very showy white flowers in mid-June, followed by small clusters of dark blue berries. One of the finest shrubs for the border.

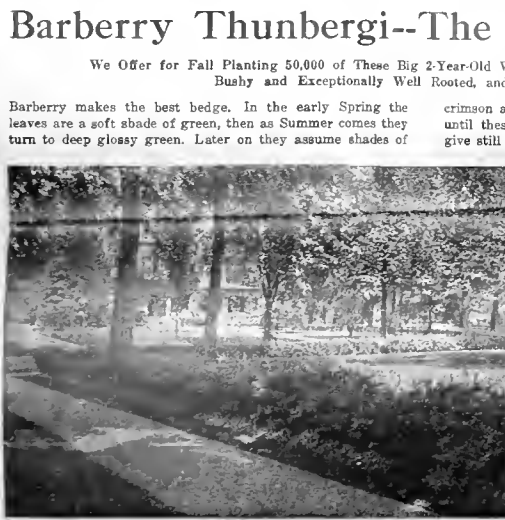

French Pussy Willow

Beautiful—Unusual—Well Worth Planting

BEAUTIFUL SUMMER AND WINTER

The only outdoor shrub grown from which you can cut bouquets during winter months. A select new improved type of Pussy Willow, perfectly hardy anywhere in the United States. Buds and blooms very large from one to two inches long after they come out in bloom. They are fragrant and make a very dainty yellowish pink and silvery bouquet. The branches may be cut in December, January and February placed in doors in a vase of water and they will soon burst open into bloom. They may be planted on home grounds everywhere. They can be used as a background like any tall shrub such as the Lilac or Snowball. They can be used as tall hedges or screens. The most interesting plant for the home grounds.

We offer fine branched plants grading 3 to 4 ft. in height at 75c each; \$6.50 per 10; \$60.00 per 100.

Barberry Thunbergi--The Hedge Everlasting

We Offer for Fall Planting 50,000 of These Big 2-Year-Old Wonderful Plants. Every Plant Healthy. Bushy and Exceptionally Well Rooted, and 15-18 Inches Tall

Barberry makes the best hedge. In the early Spring the leaves are a soft shade of green, then as Summer comes they turn to deep glossy green. Later on they assume shades of crimson and brown and bronze-green and keep these colors until these old leaves are pushed off the next spring. To give still more color the long branches carry a multitude of nearest swarms which will give food to the birds in the cold weather.

Hedges are indispensable in any planting or landscaping scheme. They are used not only for defense and for defining boundaries but are planted extensively for ornament in enclosing portions of your property and for many beautiful effects. These fences of living green beautify our homes and are rapidly supplanting old-fashioned picket or iron fences. The most widely planted hedge, especially for trimmed formal effects is Barberry Thunbergi.

Size 15-18 inches, the very best size to transplant at only
\$15.00 per 100

For best effect set plants one foot apart. Our plants will produce immediate effect.

Bearing Age Dwarf Apple Trees

Trees guaranteed to be from four to five years old and bearing this Fall. Where in the United States today are there any dwarf apple trees available? We do not know of a single nurseryman who has any Dwarf Apple whatsoever. Dwarf Apples are budded on Doucine or Angers stock. All of this stock so far as we know is grown in France or other European countries. We do not know of any American grower who is growing Angers or Doucine and several years ago the United States Department of Agriculture placed a quarantine on foreign fruit stocks. The result is no nurseryman has been able to import any. Consequently no dwarf apples have been grown or at least so far as we know, but we have been growing and have for sale approximately 1000 fine 4-year-old trees which we offer in the following choice varieties. There is quite a demand for dwarf apple trees on account of their bearing young and may be planted as closely as 12 feet. In fact they are the ideal tree for the small place. If you have been trying to obtain Dwarf Apple Trees and have been unable to do so, this is your opportunity. Order immediately because this stock of trees will not last a great while. Make your selection from the following list of splendid varieties:

WEALTHY—Standard commercial late summer and fall apple. Skin red, tree medium size. Bears early and is apt to overbear. Excellent as a dwarf and for home use.

LOBO—McIntosh seedling from Canada. Larger and better colored than McIntosh. Does not drop. Productive. Good quality. Dessert and general use. Season October to March.

R. L. GREENING—Large greenish-yellow. flesh tender. December to April.

MCLBA—Not as highly colored as Early McIntosh but has larger fruit. Same season. Seedling of McIntosh. Tree upright grower. Dessert apple, makes excellent sauce.

SPITZENBURG—Excellent dessert apple and valuable for fancy mince-meat and other culinary uses. Excellent for home gardens. Season, November to May.

BALDWIN—Large deep red, crisp and juicy. Heavy bearer. November to March.

WESTCHESTER—An excellent home use apple of the Newtown class. Skin green, red-blush. Size medium.

RED SPY—A typical Spy except that the skin is solid red instead of splashed when fully colored. It puts the old Spy out of commission.

NEWTOWN PIPPIN—Standard green dessert apple. Slow in coming into bearing. Season December to May.

	Price	\$2.25 Each	\$20.00 Per 10

LUSCIOUS TASTING ASPARAGUS

The Kind That Melts in Your Mouth

We offer some extra large, extra strong, 2-year-old plants of Pedigreed Mary Washington, the only variety we regard as worth planting.

The best high producing, tender, green Asparagus for market and home use.

100 of these big 2-year-old plants \$2.00; 1000 plants for \$17.50.

Two years ago we planted the Pedigreed seed on some of the richest land in our nursery—for three years we have cared and cultivated and even cut large tender stalks of delicious asparagus for our own tables—THESE ARE THE PLANTS WE OFFER YOU.

FOR A QUICK CUTTING BED—Plant these fine, fully 2-year-old, extra selected roots.

ORDER NOW under this guarantee: If upon receipt of shipment you find that the plants are not the finest and largest 2-year asparagus roots you have ever seen, wrap them up and return to us, and we will refund your money without question, quibble or controversy.

Growing your own asparagus is as simple as 2 + 2.

For success, the soil in which Asparagus roots are planted should be well drained and while it does not need to be necessarily rich, always remember the richer the better. Set the roots in trenches, six to ten inches deep and cover with only a few inches of soil. As the plant grows the soil can be leveled in. A heavy mulch of coarse manure should be given in the late fall. Be sure and cut the tips off before the seeds begin to ripen.

There is no variety of Asparagus as good as the Washington and no strain of the Washington near as good as the "Mary."

ROCHESTER PEACH -- It's Some Peach

Large, Yellow and Red Freestone; Ripens in August

Original orchard has produced specimens 12 inches in circumference, weighing 12 ounces.

At last a large Yellow Freestone Peach that ripens early—when you are peach hungry.

Another outstanding characteristic of this wonderful Peach is that it frequently bears the first season planted. Always the second year. Breaks records the third year. Trees planted in Spring of 1933 bore 150 to 200 perfect peaches past Summer.

Every Year Is a Rochester Year—It's All Peach

Rochester is a large yellow and red freestone, flesh yellow, very highly flavored. To eat fresh out of hand or canned, it cannot be equalled as a table delicacy. Stone very small and will ship as good as an Elberta. The peach comes into ripening when there is no other yellow and red freestone with quality on the market, hence it commands the very highest market price, ripening as it does, the middle of August. The tree is a strong upright grower, hardy as an oak, has stood 16 degrees below zero and produced a good crop while Elberta and Crawford, under the same conditions in the same orchard produced no blossoms, consequently no fruit.

Size	Each	Per 10	Per 100
3-4 ft.	\$.50	\$4.50	\$35.00
4-5 ft.	.60	5.50	50.00
5-6 ft.	1.00	9.00	75.00

ROCHESTER PEACH

Extra Large 3 Year Old Grape Vines

BIGGER — BETTER — OLDER GRAPE VINES

and as fine and as popular a list of varieties as you will find in the East.

Nothing quite so sure to grow. Nothing quite so sure to bear. Nothing quite so sure to please every taste.

Each 50c. Per 10, \$4.50; Per 100, \$40.00

VARIETIES:

AGAWAM—Red or copper color. Meaty, juicy of a rich peculiar aromatic flavor. One of the best. Season about the same as Concord.

BRIGHTON—Flesh tender whitish, sweet with scarcely any pulp. Separates readily from the seeds. Very choice as a table grape.

CATAWBA—Dark red of finest flavor. Best quality for both table and wine.

WYOMING—Sweet, early, coppery red. A wonderful grape for both the garden and the vineyardist.

DELAWARE—Berries small. Juicy, sweet. The very best quality for both table and wine and the flavor and quality is unsurpassed.

LINDLEY—A red grape of the best quality. Tender and sweet and high aromatic flavor.

NIAGARA—White. Bunches very large and handsome, melting, sweet with a flavor and aroma peculiar of its own.

CONCORD—Leading commercial grape of America. Black, early, tender, juicy, sweet. The Concord makes a light red wine which is very palatable.

Eight varieties that will suit every taste. Planted this Fall should fruit next Fall.

LOMBARDY POPLARS

It is one of the best trees for screens-windbreaks and we know of no tree grown that can give the tall, slender columnar effect so much desired in certain landscape treatments. Grows very rapidly. One can almost see it grow. Their great height, dense slenderness and sombre silhouette against the sky line, creating an impressive picturesque old-world effect. Grows from 40 ft. to 80 ft. in height. Lombardy Poplar is extensively planted in fine estates, along driveways and for backgrounds. IT GIVES A MOST ARTISTIC EFFECT AS IT CATCHES THE EYE FROM A FAR DISTANCE on account of standing out prominently. As a highway border, tall hedge, windbreak, screen or for formal effect it is ideal. Order immediately for Fall planting at these prices. Two sizes:

Size	Each	Per 10	Per 100
6-8 ft.	\$.85	\$7.00	\$65.00
8-10 ft.	1.00	7.50	70.00

EUROPEAN LINDEN

A beautiful tree for the lawn. It is sometimes called the "LIME TREE." European Linden is a large tree with spreading branches forming a symmetrical round top crown. Leaves are obliquely heart-shaped. Bright green fading in Autumn with tones of yellow and brown. The flowers are creamy-white and sweet scented. While a delightful tree for the lawn it is also a valuable tree for street planting.

Size	Each	Per 10
Size—8-10 ft.	\$2.50	\$22.50

Burbank Giant Crimson Rhubarb

Extra large, of fine bloom and a beautiful crimson color, this new variety of appetizing "pie-plant" should be in every garden and will be when known. Plant a few this Fall and set them besides those you now have growing in your garden and note the difference. BURBANK GIANT CRIMSON is superior in size and quality to any variety we have ever tested. It is an early variety, without being in the least tough or stringy, with a mild subacid flavor. The largest and best of all for market or home use. Eat more Rhubarb. Easy to grow, delicious for pies, tarts, sauce and for canning.

Price for Fall planting—extra large roots: 3 Roots for \$100; \$3.00 per 10; \$25.00 per 100.

Grow Your Own Fruit — Plant These Super-Size Fruit Trees

By all means plant them this Fall. They will become established during the winter, gain a very early spring start, make good growth next summer and on and on account of their age, there is a possibility that some might produce some fruit the first season planted.

TREES FULLY FOUR YEARS OLD, SEVEN TO NINE FEET TALL, BEAUTIFULLY ROOTED, HANDSOMELY BRANCHED

Size	Each	Per 10	Per 100
	\$1.75	\$16.50	\$160.00

Varieties of Big Super Size Fruit Trees

Luscious Apples for "Apple Jell"

RED ASTRACHAN — Large, deep crimson, juicy. August.

YELLOW TRANSPARENT—Medium size, pale yellow, good. July and August.

FAINEUSE (Snow)—Medium size, bright red, flesh white, juicy. October.

GRAVSTEIN—Large, yellow overlaid with red. Juicy, productive. September to November.

TWENTY-OUNCE (Cayuga Red Streak)—Very large, yellow splashed with red. October.

BALDWIN—Large, deep red, crisp and juicy, vigorous grower, heavy bearer. November to March.

DELICIOUS—Ranker high as a variety for commercial or home orchards. Large, brilliant dark red, flesh fine grained, crisp, juicy. November to February.

MCINTOSH—Large, deep red flesh, crisp, tender, juicy. October to December.

NORTHERN SPY—Large, bright red, spread with delicate bloom, flesh tender, rich, delicious. November to March.

RHODE ISLAND GREENING—Large greenish yellow, flesh tender. December to April.

WEALTHY—Medium to large, deep red, juicy. October to January.

SWEET CHERRIES FOR "CHERRY PIES"

DIKEMAN—Large, black.

GOVERNOR WOOD — Large, light yellow shaded and mottled with flesh fine grained.

LAMBERT—Very large, dark purplish red, turning to almost jet black when full ripe.

ROYAL ANN—Very large, pale yellow, spotted and shaded with deep red.

BLACK TATARIAN—Very large, black tender.

JUICY PLUMS FOR "PLUM CONSERVE"

BRADSHAW — Very large, dark violet-red.

Bearing Filbert Trees, Grown From Layers

Northern New York grown, withstanding the toughest winter in this section (1933-34), with temperatures at times of 20 or more below zero, yet these trees suffered no winter injury and bore an abundance of nuts the following season. These trees are actually loaded with nuts right now and these are the trees we are digging and shipping this Fall. 1000 pounds of delicious nuts have been harvested from less than 3 acres planted with these improved varieties of European Filberts grown at Rochester, N. Y. Plant some of these hardy trees this Fall. Order now. Set the trees 18 ft. apart. An acre would require 135 trees. They also make a delightful ornamental and are frequently used in shrub borders. We offer the following varieties of bearing trees:

ZELLER MINNA—Nuts good size. Of value for pollination. Heavy producer of pollen, and productive.

ZELLER BUTTNER—Nuts small, very productive. Mature early. Good pollinizers.

EARLY CLOBE—Nut medium size. Good quality.

Size—3-4 ft., \$1.75 each; \$16.50 per 10; \$150.00 per 100.

Size—4-5 ft., \$2.00 each; \$18.50 per 10; \$175.00 per 100.

KENTISH COB—One of the best. Nut very rich flavor, very good.

LARGE CLOBE—Roundish nut, good size. Good grower, productive.

ITALIAN RED—A long nut adapted to the South.

MEDIUM LONG—Very desirable long nut. Good size.

12 Top-Notch Varieties of Peonies

Of Magic Color and Huge Size

Price: Any 3 for \$1.00 or 12 for \$3.75

June—the Month of Peonies

They rival roses in beauty, form and exquisite color and excel them in size. Noblest and most beautiful of all flowers. These lovely flowers are all indispensable in every garden and are frequently used in shrub borders. We offer the following varieties of Peonies:

RUBENS—Very dark crimson. Large semi-double type. Fragrant. Early.

MME. CALOT—Pale hydrangea pink. Center shaded darker. Large rose type. Free flowering. Fragrant early.

LOUIS VAN HOUTTE—Cherry red. Medium size. Semi-double type. Fragrant. Late.

BERLOIZ—Purple-red. Large rose type. Very fine bloomer. Late.

CALUD—Yellow, lobular bomb type. Medium size. Fragrant. Late.

FESTIVA—Pure white flecked with rich crimson. Very large rose type, free flowering. Fragrant. Mid-season.

EDUIS SUPERBA—Dark rosepink. Crown type. Strong upright bloomer. Fragrant. Early.

DELACHI—Dark, clear crimson. Large rose type. Very fine bloomer. Late.

DOUCHESSE DE NEMOURS—Milk white. Medium size. Crown type. Fragrant. Early, mid-season.

L'ELATANTE—Bright crimson. Very large bomb type. Strong grower. Late mid-season.

JEANNOT—Pale rose pink, deepens to old rose in center with distinct overcast of pale violet. Large double bomb type. Late.

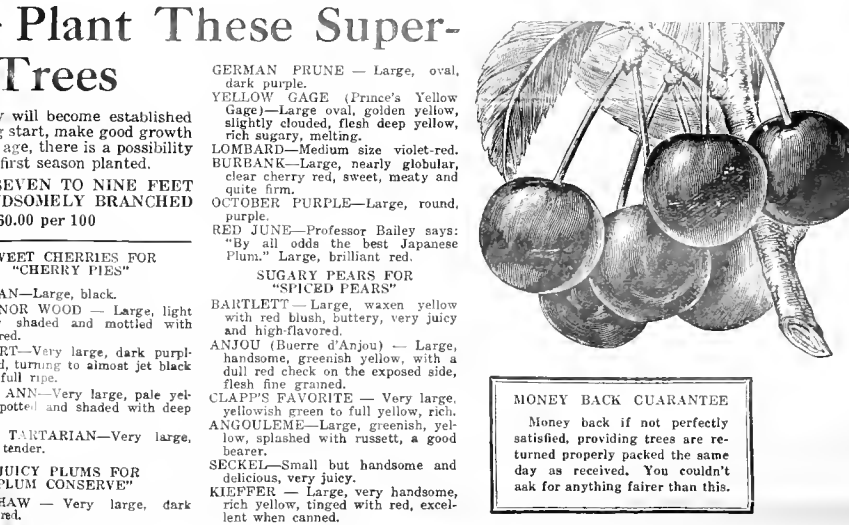

FELIX CROUSE—Brilliant crimson. Large double rose type. Even tone. Silky luster. Mid-season.

Babylonica Weeping Willow

This is the common weeping willow. Makes a beautiful, lacy tree. Attractive for planting beside creeks, ponds, pools and other waterside planting. It has long whiplike branches, weeping to the ground. Babylonica Willow is without doubt one of the most remarkable of trees. The leaves are narrow, tapering to a long point and bright green. The bark is particularly handsome in Winter. We offer this variety for Fall planting in a limited quantity only in the following sizes and prices:

Size	Each	Per 10
6-8 ft.	\$1.75	\$15.00
8-10 ft.	\$2.75	\$25.00

Grow Your Own Fruit — Plant These Super-Size Fruit Trees

By all means plant them this Fall. They will become established during the winter, gain a very early spring start, make good growth next summer and on and on account of their age, there is a possibility that some might produce some fruit the first season planted.

GRAVSTEIN—Large, yellow overlaid with red. Juicy, productive. September to November.

TWENTY-OUNCE (Cayuga Red Streak)—Very large, yellow splashed with red. October.

BALDWIN—Large, deep red, crisp and juicy, vigorous grower, heavy bearer. November to March.

DELICIOUS—Ranker high as a variety for commercial or home orchards. Large, brilliant dark red, flesh fine grained, crisp, juicy. November to February.

MCINTOSH—Large, deep red flesh, crisp, tender, juicy. October to December.

NORTHERN SPY—Large, bright red, spread with delicate bloom, flesh tender, rich, delicious. November to March.

RHODE ISLAND GREENING—Large greenish yellow, flesh tender. December to April.

WEALTHY—Medium to large, deep red, juicy. October to January.

SWEET CHERRIES FOR "CHERRY PIES"

DIKEMAN—Large, black.

GOVERNOR WOOD — Large, light yellow shaded and mottled with flesh fine grained.

LAMBERT—Very large, dark purplish red, turning to almost jet black when full ripe.

ROYAL ANN—Very large, pale yellow, spotted and shaded with deep red.

BLACK TATARIAN—Very large, black tender.

JUICY PLUMS FOR "PLUM CONSERVE"

BRADSHAW — Very large, dark violet-red.

You can't beat LATHAM for Big Red Raspberries

A Source of Pleasure and Economy for Home Owners

Why pay 20c a pint for Raspberries at the stores when fresher berries can be so easily raised in your garden? Enjoy the pleasure and profit of growing your own.

Latham doesn't require expert attention. Our Mosaic-free plants are healthy and vigorous and produce abundantly. They commence to bear soon, and continue for many years. Latham will produce the most berries for the least work of anything you can plant.

We say strong healthy plants, we will go further and say that if our Latham are not the biggest, best-rooted raspberry plants you ever bought just send them back and we will return your money.

EASY TO GROW

Latham Raspberries can be easily grown in the home fruit garden and they require little care.

Latham is 100% Raspberry

SENSATIONAL IN YIELD AND PROFIT

\$430 qts. per acre—\$1629.00 per acre

The superior yielding ability of Latham is fairly represented by the following comparative figures. Reprinted from

the Connecticut Agricultural College Review, September, 1926. W. H. Darrow, Fruit Specialist.

Report on 3-year-old field: Latham, 5430 qts. per acre; Herbert, 3548 qts. per acre; Cuthbert, 3600 qts. per acre; 5430 qts. per acre at 30c per qt. makes the net return of \$1629.00 per acre.

Latham is so good that we will pay \$1000.00 cash for the exclusive selling rights of any new raspberry that is superior to Latham in hardiness, bearing qualities, size and color.

\$1.00 per 10; \$7.50 per 100

Hardy Nut Trees — Northern N. Y. Grown

The ENGLISH WALNUT—Grown by us, were started from seed produced from bearing trees grown in this locality, hence we can recommend them as being hardy and can reasonably expect these acclimated trees will thrive wherever peaches or cherries will succeed.

Sizes—2-3 ft., \$1.50 each; 3-4 ft., \$2.00 each.

BLACK WALNUT—One of the most valuable Nut Trees grown. Absolutely hardy, growing and bearing under adverse conditions. From Canada to the Gulf of Mexico the Black Walnut will thrive, making rapid sturdy growth and soon producing nuts that have a richness to the flavor that is peculiar to this nut.

Sizes—5-6 ft., \$1.50 each; 6-8 ft., \$1.75 each.

BUTTERNUT—One of the finest native nut trees. The trees bear young and after they come into full bearing will bring large returns on the original investment. For hardiness, disease resistance and general all-around desirable characteristics the Butternut has few superiors.

Sizes—5-6 ft., \$1.50 each; 6-8 ft., \$1.75 each.

OUR CLIMBING ROSES

Soon Beautify Unightly Spots

3 ARISTOCRATS FOR \$1.75

People are going wild over Climbing Roses. Under the auspices of Women's Clubs and Garden Clubs they are being extensively planted along the Cape May Highway in New Jersey, the Lincoln Highway in Pennsylvania and other thoroughfares.

For the Porch, Pergola, Arbors, Trellis, etc.

PLANT OUR CLIMBING ROSES

One each of these 3 for \$1.75

TAUSENSCHON—Well merits the name "Thousand Beauties" for the large clusters of flowers vary in color from pink to white. Magnificent foliage. No thorns.

DR. VAN FLEET—Buds long, pointed deep pink, deliciously fragrant.

PAUL SCARLET CLIMBER—A large flowered, low climber of brilliant dazzling red. Does particularly well as a pillar rose, trained to a post.

Paper Or Canoe White Birch

A Birch With a Paper-White Bark

Probably every person who has ever seen the beautiful and graceful White Birch on the Massachusetts hills has wanted a similar tree upon his own property. The bark is silky, thin peeling. The tree's habit of growth is symmetrical and from every point of view Birches are romantic and beautiful trees. We offer a few choice, specially collected specimen trees in extra large size as follows:

10-12 ft.	\$3.75 each	\$35.00 per 10
12-14 ft.	5.00 each	45.00 per 10

NEW RED-LEAVED Japanese Barberry

If it is color you want among your shrubs, this is the Barberry to plant.

It is only once in a lifetime that a really worth-while outstanding novelty in hardy shrubs is introduced and in this new Barberry we have such a plant.

It is similar in all respects to the green-leaved Japanese Barberry which is so popular for mixing in the shrubbery border, as single specimens or for planting in clumps on the lawn, as well as for foundation plantings and for hedges but the foliage of this new variety is of a rich, lustrous bronze red similar to the richest red-leaved Japanese Maples. However, unlike these and other colored shrubs in which the coloring fades or disappears entirely as the season advances, this new Barberry becomes more brilliant and gorgeous throughout the summer and in the Fall its foliage changes to vivid orange, scarlet and red shades, more brilliant and more effective than in the ordinary Japanese Barberry. In this coloring it is unequalled by any other shrub and is followed by the same brilliant scarlet berries common to the type which remain on the plant the entire winter.

All that is required to develop its brilliant coloring at all seasons is that it is planted in full exposure to the sun.

Large bushy plants grown expressly for landscape purposes.

18-24 inches	\$6.00 per 10; \$50.00 per 100
24-30 inches	7.50 per 10; 60.00 per 100

3 Smart Late Fall Shrubs

3 Smart Early Spring Shrubs

ALL LARGE SPECIMEN PLANTS 3-4 ft. SIZE

THE FOLLOWING SIX FOR \$3.75

VIBURNUM TOMENTOSUM—Beyond doubt the most superb flowering shrub grown. Flowers white in flat heads fruit red then blue-black.

VIBURNUM OPULUS—This is a showy shrub in early winter when covered with large clusters of glossy red berries, white clusters, late May and early June.

VIBURNUM CASSANOIDES—The broad bunches of berries are first green and then change to shades of rose-pink lavender, finally to blue-black. White flowers in June.

FORSYTHIA FORTUNEI—Branches gracefully arching. Golden yellow flowers in profusion.

FORSYTHIA SUSPENS—Very long curved branches giving a weeping appearance with every twig densely clothed with nodding four-petaled bright yellow flowers in the latter part of March or early part of April.

FORSYTHIA INTERMEDIA—This is the showiest of all Forsythias with a specially dense flowering habit, and several shades darker yellow than any variety, surpassing all in profusion of bloom and vigorous growth.

The simply gorgeous late Fall colorings of the Viburnum are almost impossible to conceive, running riot through brilliant shades of scarlet, red, and purple together with an abundance of large clusters of glossy berries which in many instances remain on through to Christmas.

The Forsythias or Golden Bells start in where the Viburnums leave off. In early spring before the leaves appear and sometimes when the snow is still on the ground they are literally covered from tip to tip with bright yellow flowers. Forsythias have become one of the most popular groups of shrubs grown in the garden. You will obtain oodles of pleasure and satisfaction from planting these six delightful shrubs this Fall. All 6 for \$3.75.

GLEN'S NARCISSUS and DAFFODILS

In a Choice Assortment of Varieties

Price—\$1.40 per dozen — \$8.50 per 100

EMPEROR (Trumpet Class). Deep primrose perianth, rich, full yellow trumpet. Very large flower. One of the best in the trumpet class.

EMPRESS (Trumpet Class). Perianth white and of great substance. Bright yellow trumpet. Very showy in the border.

LUCIFER (Incomparabilis)—A lovely glowing orange fluted cup surrounded by long flowering white petals make this a showy messenger of Spring, of decidedly cheerful appearance in the border, in woodland meadows or in bowls and vases. Who can forget the huge perfect pans of it at the New York Flower Show, three to five flowers per bulb.

LAURENS KOSTER (Pottaz)—Pure white, orange-yellow cup, 5 to 7 blooms per stem. It stands out as one of the best.

SOUTHERN GEM (Leedsii)—A giant Leedsii with pure white petals and large lemon crown which becomes cream as the flowers develop. Splendid size and texture.

FIREBRAND (Barris)—A combination of cream-white petals and flowing red-fluted cups, real suggestive of live bits of coals resting on sheer inflammable material. Not inferior to any of the most expensive in brilliancy. A very free flower when established a year or more.

ALBO PLENO ODORATO (Double)—Pure white, beautiful with a delightful fragrance of orange blossoms. Strong stems. Blossoms very late. Whole patches can be found near old homesteads in New York and Connecticut which produce masses of excellent double flowers every season.

PHEASANTS EYE—Two thousand years ago the Romans attached spiritual value to the flowers and ascribed great medical properties to the roots. Its beauty and perfume still charm many gardens throughout the world.

PAPER WHITES—The best Narcissus for growing in water. The flowers are large, attractive in color, intensely fragrant, planted in bowls with pebbles and water bloom in six weeks, depending upon the season planted. Only the largest bulbs procurable should be used. Mammoth bulbs, \$1.00 per dozen; \$8.00 per 100.

Three Delightful Flowering Crabs

No tree could be more lovely than these in their first stages of round shiny buds and their second stage of part buds and part open flowers, followed by a smothering expanse of full-bloom flowers. Then comes their final gesture later when the trees are sparkling with brilliant fruits varying in size and color according to the variety.

We offer a quantity of beautiful trees 4 to 5 years old that are now well matured and will produce immediate effect. These trees will grade possibly 5 to 6 feet in height, are well branched and as stated, are from 4 to 5 years old. These will give you immediate results.

We offer one each of the following fine varieties in trees of the age and size described for \$5.00 (single trees \$2.50 each).

VARIETIES:

ELEYI—Brilliant purplish-red foliage rivaling the Japanese Maple, and the beautiful red fruits that appear later are spectacular.

SPECTABILIS—The flower bud is coral-red. Very fragrant and very large. The fruits are borne in great profusion and are pale yellow in color. Very showy.

NIEDZWETZKWANA—Sometimes called the red-veined Crab. Red to purple foliage, bark, buds and flowers with large purple fruits. They are a red flesh. The fruits are edible and make delicious jelly. We do not know where you could find 3 such delightful Flowering Trees for the lawn and the price, for the entire 3, is only \$5.00

Live Christmas Trees

The Original Christmas Tree

NORWAY SPRUCE

Produce little nuggets of golden spruce gum. It's a cone bearer. Cones hang downward, making it very ornamental. It is one of the best trees for shelters and windbreaks, being an extremely rapid grower. The needles are a rich green, five-eighths of an inch long, pungently fragrant. Our trees are particularly well shaped and excellent compact habit. We lift each plant with a large ball of earth and ship with earth burlapped to roots.

We offer for Fall planting a large range of sizes as follows:

2-3 ft.	\$2.00 each
3-4 ft.	2.75 "
4-5 ft.	4.50 "
5-6 ft.	6.50 "
6-7 ft.	9.00 "
7-8 ft.	11.00 "
8-9 ft.	13.50 "
